

April 5, 2006

Marlyn,

As per our conversation, we are extremely pleased with the three graduates of your program that we have hired here in Phillipsburg. Adam Boyer is now the head technician who schedules and coordinates the assignments of the other technicians. Chris Josack has taken on the responsibility for network and server administration and has done an excellent job. Felix Quach has been assigned to our middle school and provides desktop support for staff and students.

One of the most demanding positions in the district is building level tech support. In most instances your interpersonal skills must at least be the equal of your technical skills. Felix has excelled in this position. He has not only raised the quality of the technology in the building, but at the same time has earned the respect of both the administrative and teaching staff.

Our experience with your graduates has us very much looking forward to participating in your internship program. We believe that we can provide a diversity of opportunities for your students, and just maybe find another Adam, Chris or Felix for us.

Thank You,

*Larry McKenna*

Director of Technology  
Phillipsburg School District, Phillipsburg, NJ
